## Enhancements in RTS POS 24.1

### RRTS-32512 Prevent Issuance of Duplicate General Issue Plate Validation against Core

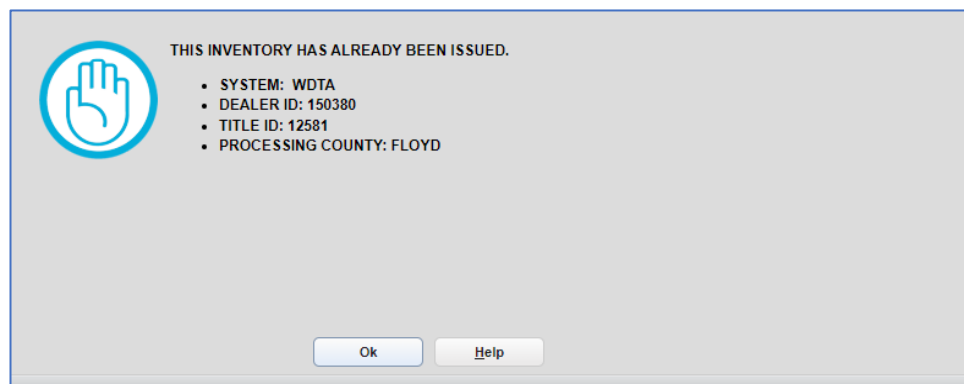

When processing a transaction and users enter a plate number, the system will validate the plate number to ensure that duplicate plate numbers are not being reissued. If a plate number has been issued in the system, users will be presented with one of the following error messages. Transactions will not be able to be completed until a new plate number is assigned.

If the inventory has been issued or is on hold in a transaction the below error message will display.

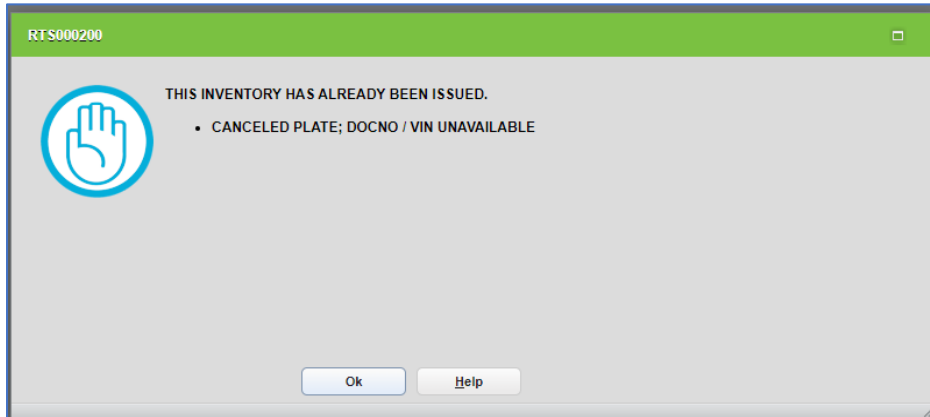

**NOTE:** The error message will contain variations of the VIN, DOCNO and ISSUED date, determined by the information available on the motor vehicle record.

If the inventory is found in a webDEALER transaction the following error message will display:

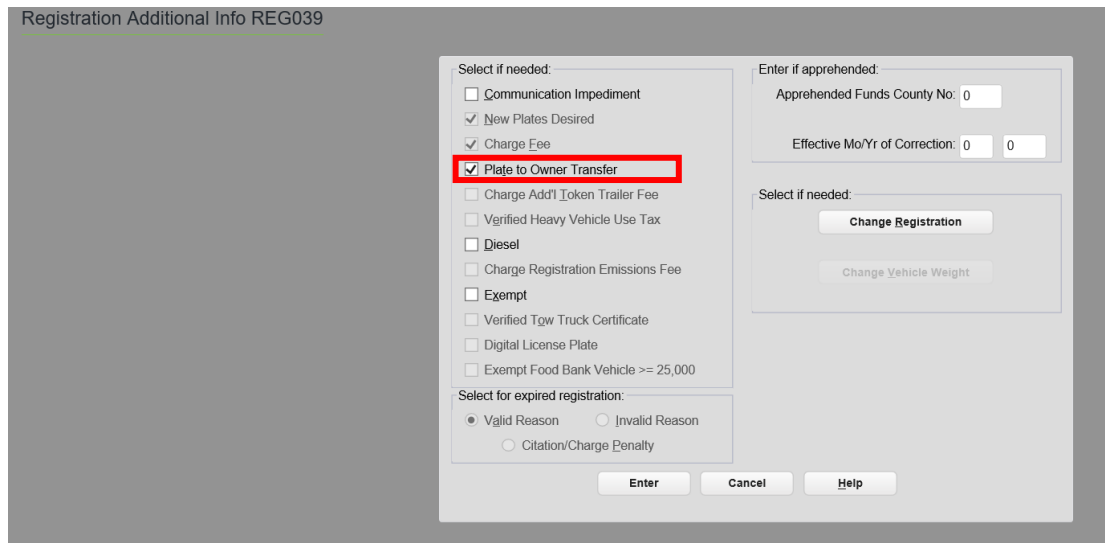

If the inventory is cancelled the following error message will display:

If an owner wants to transfer eligible license plates, the transfer should be allowed as long as the county tax assessor-collector's office can confirm the name on the vehicle record matches the name of the individual requesting to transfer the license plates. If the vehicle record has already changed, transfer may still be allowed if the individual can provide a prior registration receipt in their name.

On the **Registration Additional Info REG039** or **Title Additional Info TTL008** screens, utilize the **Plate to Owner Transfer** checkbox.
