

webDEALER: Making a Difference

Texas is home to more than 25,000 dealers. Among them are:

- ✓ 2,600 franchise dealers
- ✓ 15,300 used car dealers
- ✓ 8,600 salvage dealers

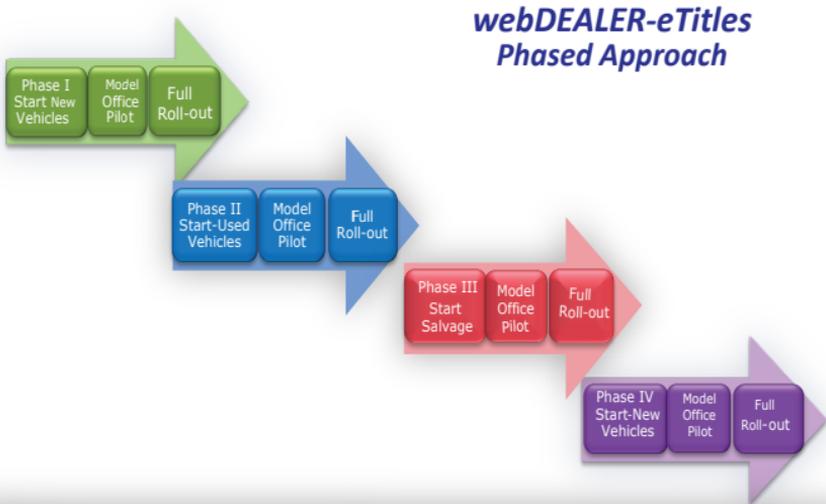

Each year, county tax offices are taking millions of new title and registration applications. In fact, in 2012 the TxDMV issued 6.2 million titles. As the state grows, so does our work.

With the introduction of webDEALER, county tax offices will save time and money. But most importantly, you will be protecting customers. The move to webDEALER to create eTitles will help to reduce title fraud.

How soon will webDEALER be coming to you?

The program will be phased in with the first Model Office beginning in September 2013. Each phase will have a Model Office time period before the phase is fully implemented.

Stay tuned to the new TAC Hub for updates!

webDEALER provides functionality to allow all dealerships to move to an electronic titling system.

Texas Department of Motor Vehicles
HELPING TEXANS GO. HELPING TEXAS GROW.

Created for Dealers With TACs in Mind

webDEALER is the electronic title and registration system that processes applications from any Internet-connected computer. Tax Assessor-Collectors will find it saves time for county tax office personnel and money for the county tax office.

What will webDEALER do and what's in it for you?

- ✓ Cuts the paperwork. Eliminates the paper-based system, allowing for electronic data submission, including transfers and fees.
- ✓ eTitles. It supports the electronic storage of all TxDMV-issued titles.
- ✓ Reads the hard stops. It won't process title and registration applications with hard stops. (No more fund adjustments or rejected title transactions!)
- ✓ Stops the drops. Dealers won't have to come into your office for title and registration transactions.
- ✓ No longer will you have to tie-up valuable workers to process dealer title and registration applications. Replaces dealers' existing Remote Sticker Printing System (RSPS).
