INTRODUCTION TO VERSION 5.2.6

Fall Admin Table Updates

New License Plates and Item Codes

The following new license plates and related item codes have been added to both the RTS application and the RSPS database.

ITEM CODE	ITEM CODE DESCRIPTION
TXREALTR	TEXAS REALTORS ASSN PLT
PLPTXRLT	PER TX REALTOR ASSN PLT
TXRLTRMC	TEXAS REALTOR ASSN MC PLT
PLPRLTMC	PER TX REALTR ASSN MC PLT
SILVRSTR	SILVER STAR MEDAL PLT
PLPSLVST	PER SLVR STR MEDAL PLT
SILVSTMC	SILVER STAR MEDAL MC PLT
PLPSVSMC	PER SLVR STR MEDAL MC PLT

Revised License Plate Patterns

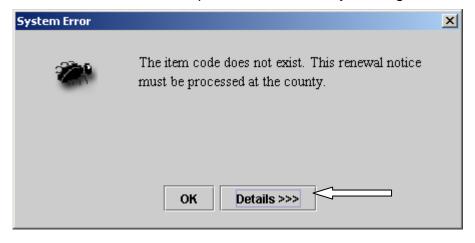

State Judge and U.S. Judge license plate patterns have been expanded to include the following:

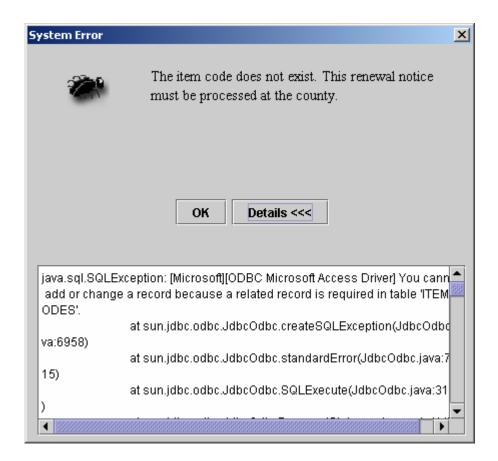

PLATE DESCRIPTION	PLATE PATTERN	EXPANDED EXPIRATION YEAR
STATE JUDGE	TX1A – TX999F	2007, 2008, 2009, AND 2010
U.S. JUDGE	USA01 - USA99	2007, 2008, 2009, AND 2010
	USA01A – USA99F	

New Error Message in RSPS

Previously, when a renewal was scanned containing an account code or item code not existing in the RSPS Item Codes Table, a generic error message appeared.

A system error message now appears when a renewal is scanned containing new code that is not recognized by the RSPS laptop because it has not been updated. When conferring with TxDOT support staff concerning the error, they may request that the user retrieve information specific to the error by clicking on the **Details** button.

Note: Renewals can be processed at the County Tax Office until updates are made to the RSPS units.

Reminder:

Remember that although updates are being received the county should not flash the RSPS units until a stock of the new sticker paper has been received.

VERSION 5.2.6 ACTIVITY CHANGES

PRIMARY EVENT SELECTION	SECONDARY EVENT SELECTION	ACTIVITY DESCRIPTION	STATUS
CUSTOMER	Dealer Titles	Problem:	Fix completed:
Title/Registration		Workstation statewide had consistent out-of-memory issues	Each workstation will now release memory as needed, following completion of a transaction.
LOCAL OPTIONS	Security	Problem: Previously, spaces and dashes could not be entered into the Employee Id, User Name, First Name and Last Name input fields.	Fix completed: Users will now be allowed to use spaces and dashes in the Employee Id, User Name, First Name and Last Name input fields.
RSPS	Refresh	Problem: The system had difficulty refreshing the RSPS code from code server to workstations.	Fix completed: After code is deployed to each individual workstation, refresh will function properly.
<u>FUNDS</u>	Close Out	Problem: If client closed out quickly after the last transaction, the server time may still be behind the client time for the last transaction. In addition, if a transaction was created quickly after close out, the server time may have been ahead of the client time. After each of these scenarios, it was possible that the last transaction would not appear on the Close Out report.	Fix completed: All completed transactions should now appear on the Close Out report.
