## **Cognos Enterprise Reporting Release Notes**

**Release Q5**

**November 21, 2016**

# About Release Notes

These Release Notes contain information about new Cognos Enterprise Reporting features added, enhancements made, and issues resolved in this product release.

Although a brief introduction to Cognos Enterprise Reporting is provided in this document, more details about Enterprise Reporting is available from the original Release Notes available on the **Release Notes & Support** tab on the TAC Hub ([www.txdmv.gov/tax-assessor-collectors](http://www.txdmv.gov/tax-assessor-collectors)).

The contents of these Release Notes include:

<b>Cognos Enterprise Reporting Overview .....</b>	<b>3</b>
<b>New Reports in Release Q5 .....</b>	<b>4</b>
<b>Enhancements to Existing Reports in Release Q5 .....</b>	<b>6</b>
<b>Enterprise Reporting Issues .....</b>	<b>8</b>
Issues Resolved in Release Q5 .....	8
Summary of Reporting Issues Not Yet Resolved .....	8

**Note:** As a reminder, the information and data available to you in Cognos Enterprise Reporting is based on your business area and the access permissions you have.

# Cognos Enterprise Reporting Overview

Cognos Enterprise Reporting is a business intelligence tool that transforms data collected in RTS into usable information for business decision making and analysis.

The Cognos Enterprise Reporting tool updates and refreshes most report data nightly to help generate reports with the most up-to-date data. Instead of running a correction report when an update is made to a transaction, the report containing the data can be run again to pick up the new or corrected information.

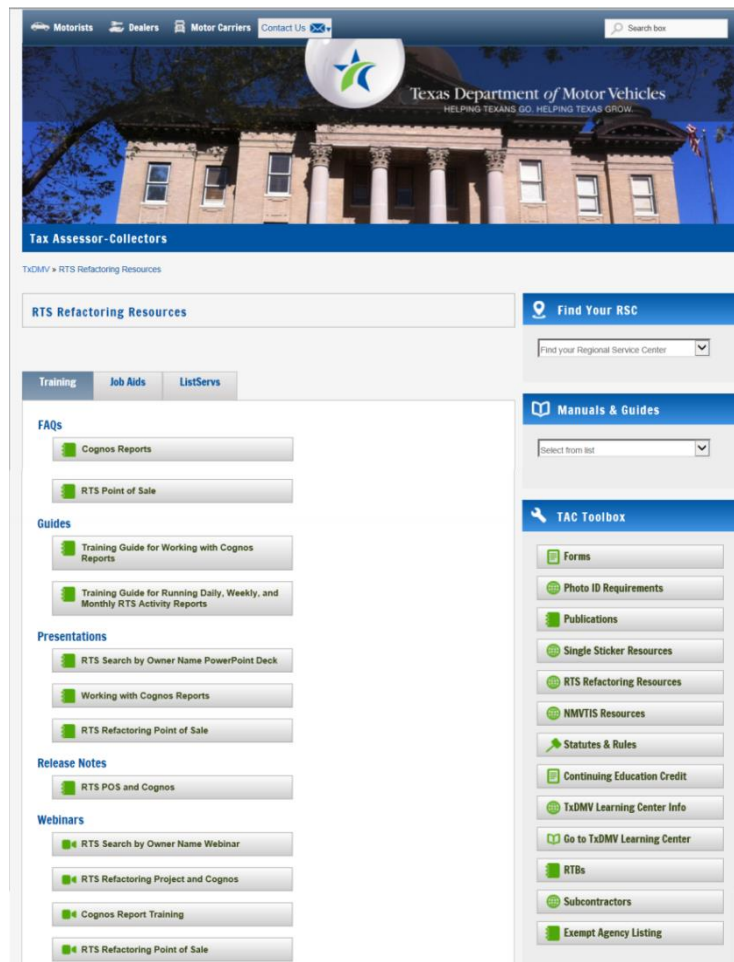

The internal-use Cognos Reports shortcut icon displays on all RTS workstation desktops. Although you can click the icon and attempt to log into Cognos Enterprise Reporting, login will be successful only if you have the appropriate permissions to access and use it.

To display reference information about using the Cognos Enterprise Reporting tool, click the  RTS Refactoring Help icon on your desktop to display the RTS Refactoring Resources page of the TAC Hub that contains materials to view, download, and print.

By default, the Resources page opens on the **Training** tab, which contains FAQs composed of questions submitted by the county tax offices and other materials presented during webinars (including the training guides, slide deck presentations, and recorded webinar sessions). The original Release Notes are also available.

You can click the **Job Aids** tab to locate important quick references to help you log in and work with Enterprise Reporting.

**Note:** It is important to visit the RTS Refactored Resources page frequently for updates and new materials.

# New Reports in Release Q5

This release contains a reinstatement of a legacy report (Employee Detail Transaction report) in the Cognos Enterprise Reporting tool.

## Employee Detail Transaction Report

The Employee Detail Transaction Report is available to provide information about the transactions performed by each employee within the county including the transaction code, transaction count, and mail fee transaction total amount. Note that this is not a new report; it reinstates the details available in the legacy Employee Transaction Report.

The following shows the Prompts page for the Employee Detail Transaction Report and is followed by a sample report.

The screenshot displays the 'EMPLOYEE DETAIL TRANSACTION REPORT' prompts page. At the top left, it shows 'RTS.PER.001' and the Texas Department of Motor Vehicles logo. The main title is 'EMPLOYEE DETAIL TRANSACTION REPORT' under the heading 'Registration and Title System Report'. The page contains several interactive elements:

- Select Start Date:** A date picker set to 'Nov 17, 2016'.
- Select Office Type:** A list box containing 'COUNTY', 'REGIONAL OFFICE', and 'HEADQUARTERS'. A 'Refresh' button is located to its right.
- Select Office:** An empty list box with a 'Refresh' button to its right.
- Select End Date:** A date picker set to 'Nov 17, 2016'.
- Select Transaction Type:** A list box with various transaction codes such as '144-HOUR PERMIT RECEIPT', '30-DAY PERMIT RECEIPT', and 'ADDING JUNK REC (MAINFRAME MODIFY/REINSTATE)'. A 'Refresh' button is located to its right.
- Select Employee Name(s):** An empty list box.

At the bottom of the page are 'Cancel' and 'Finish' buttons. Two red callout boxes provide instructions: one points to the 'Refresh' button next to 'Select Office Type' with the text 'Click here to get the offices listed in the Select Office panel'; the other points to the 'Refresh' button next to 'Select Transaction Type' with the text 'Click here after displaying and selecting offices to view all of the employees. You can select specific employees or just click Finish to select them all.' Links for 'Select all' and 'Deselect all' are visible below the 'Select Office Type' and 'Select Transaction Type' list boxes.

RTS.PER.001

## Enhancements to Existing Reports in Release Q5

The following report has been updated.

### Sales Tax Fund Report

The Sales Tax Fund Report has been updated by adding a new Void Indicator column to the report and displaying the total count of the number of voided transactions for each employee selected for this report.

The following shows a Sales Tax Fund Report with the Void Indicator column and the total counts.

SALES TAX FUND REPORT

# Enterprise Reporting Issues

Enterprise Reporting issues documented in this section may have been reported by county, region, or headquarters users and may not apply to all Enterprise Reporting users.

## Issues Resolved in Release Q5

No extra Enterprise Reporting issues were resolved in this release that were not included in the general update information in the sections above.

## Summary of Reporting Issues Not Yet Resolved

No Enterprise Reporting issues that affect county users are currently under investigation.
