November 2010 2

At a Glance

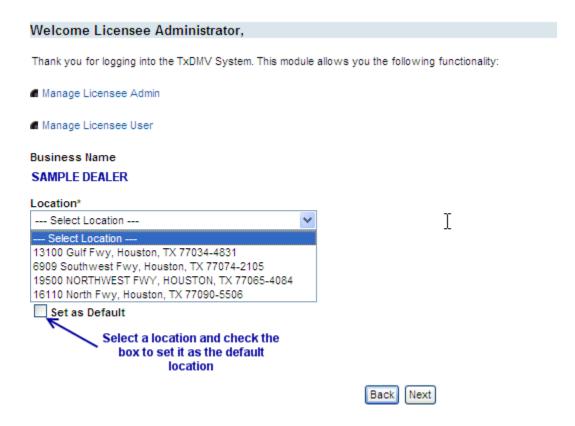

This release of e-Tag contains a change to the Location and Doing Business As (DBA) selection screens to allow dealers with multiple locations and DBAs to select a default.

- Location and DBA selections are now on the Welcome Page
- DBA selection is now called 'Name to Print on e-Tag'

Location Selection

The **Location** selection is now made from the Welcome Page and includes the ability to select a default location for dealerships with multiple locations. (See example below)

- Single locations will automatically appear in the selection box
- Multiple locations allow the user the option to select a location and set it as the default by checking the Set as Default checkbox.
 - Default locations will then appear in the location box upon signing in to the system
 - You may change or remove default locations when needed
 - If you do not select a default, all available locations appear in the drop down box

Doing Business as (DBA) Selection

The DBA selection now appears as **Name to Print on e-Tag** and includes the ability to select a default for dealerships with multiple DBA entries. (See example below)

- Dealerships that do not use a DBA will see the selection box as disabled.
- Dealerships with multiple DBAs now have the option to select a default DBA by checking the Set as Default checkbox
 - The default name will now appear in the Name to Print on e-Tag selection box upon signing in to the system
 - You may change or remove default names when needed
 - If you do not select a default, all available DBA names appear in the drop down box
