Update to webDEALER Administrator Permissions	4

Document Overview

This document describes the latest software changes made to the Texas Department of Motor Vehicles (TxDMV) webDEALER software application.

Scope

The scope of this is to identify recent software changes to the webDEALER application as documented in the latest webDEALER User Guides. This document does not provide step-by-step instructions on how to use webDEALER.

Audience

The intended audience of this document are users of webDEALER.

Enhancements in Release 24.3

Update to webDEALER Administrator Permissions

New webDEALER Administrators must be fingerprinted prior to receiving Administrator privileges. This includes applicants requesting eTAG Administrator privileges when completing new, renewal, or amendment dealer license applications within the eLICENSING system.

Current and new webDEALER Administrators will have the ability to:

- Create new users
- Grant permissions to new and existing users

webDEALER Administrators will no longer have the ability to grant Administrator permissions to new and existing users. The Administrator permission check box located under the webDEALER section of the Assigned Permissions page will be greyed out and the check box cannot be selected.

The screenshot shows the webDEALER user management interface. At the top, there is a navigation bar with 'Home Page', 'Titles', 'Payments', 'Administration', and 'Support' buttons, along with a search field for VIN / Deal # / Unit #. The main content area is titled 'User Details' and contains two sections: 'User Information' and 'Assigned Permissions'. The 'User Information' section displays fields for Dealer ID, Dealer Name, Username, Name, Status, and Email, all of which are redacted with blue bars. The 'Assigned Permissions' section is expanded to show the 'webDEALER' category. Under this category, there is a list of permissions: 'Administrator (Manage Account and Users)', 'View Title', 'Add/Edit Title', 'Access Payment', and 'Web Service Access'. The 'Administrator' checkbox is highlighted with a red box, indicating it is the focus of the update. Below the permissions list, there are sections for 'eTAG' and 'eTITLE (webDEALER)'. At the bottom, there are 'Save', 'Cancel', and 'View Associated Dealer(s)' buttons.

Once TxDMV has verified that a user has completed the fingerprinting process, TxDMV may grant the user webDEALER Administrator privileges. Current Administrators that were granted Administrator privileges prior to RTS Release 24.3 will remain as existing Administrators but will no longer have the ability to add additional Administrators.
